Andre Villanueva
IOS/Web Developer

Los Angeles, CA 90003

Andre@AndreVillanueva.com - (323)434-1222

Six years of architecting, designing, developing, and debugging software/video games on platforms such as Windows, Web, and Mobile Devices using IOS. Two years experience using C++, 4 years experience in mobile IOS development using Objective-C and Swift, and recently Web Development where I mostly used HTML and CSS, but also picked up the basics of Javascript and PHP using Wordpress. All of these things have been accomplished as a self-starter/self-taught Developer.

Willing to relocate: Anywhere

Authorized to work in the US for any employer

ADDITIONAL INFORMATION

Objective: Seeking employment with in an organization that will utilize my various developer skills at an entry level position in the IOS Development industry where I can contribute, gain experience, and challenge myself, and my team members to become better. The bigger and more interactive I am with the team the better. Although I am looking for an entry level position, I am a proficient/experienced developer; capable of developing an app independently, but my priority is working on a team interacting with as much of the team as possible. I will strive to become a vital part of the organization where we can push our limits consistently as I love to push mines to reach points beyond expectations.
